

Connect to ECS from WSL

1. Create AWS account.
2. Launch Instance -> Follow Standard settings for Free Tier. In the end of Instance creation, create key with a filename and download 'filename.pem file'
3. Open WSL on Windows.
4. Use the following commands:
 - `cp /mnt/c/file_path_to_pem_file /filename.pem /home/`
`file_path_to_save_pem_file/ filename.pem`
 - ***cd*** to folder containing filename.pem
 - `sudo ssh -i filename.pem ubuntu@instance_dns`
 - You can find your instance DNS from AWS Instance console which you created
 - Enter WSL password.
5. Connected.
